INDEX TO VOLUME 106

INDEX TO SUBJECTS

Absorption Lines Formed in a Moving Atmosphere. *Anne B. Underhill* 128

Absorption Lines within the Hydrogen Emission of Mira Ceti, The. *Alfred H. Joy* . . 288

AR Aurigae, A Photoelectric Study of the Eclipsing Variable. *C. M. Huffer and Olin J. Eggen* 106

ρ Cassiopeiae in 1946, The Infrared Spectrum of. *Philip C. Keenan* 295

TU Cassiopeiae, and T Monocerotis, Photoelectric Light-Curves of RR Lyrae. *Katherine C. Gordon and Gerald E. Kron* 318

β Cephei, A Note on. *Nancy G. Roman* 311

AH Cephei=HD 216014, A Photoelectric Study of the Eclipsing Binary. *C. M. Huffer and Olin J. Eggen* 313

ZZ Cephei and UY Virginis, The Eclipsing Binaries. *George H. Herbig* 112

Cepheid Variables in Cygnus, Colors of Seven. *Francis J. Heyden, S.J.* 325

Cepheids, A Note on the Period-Spectrum Relation among. *Arthur D. Code* 309

F. Cernuschi's Paper, "The Physics of Cosmic Grains," Remarks on. *D. ter Haar* . . 484

Mira Ceti, The Absorption Lines within the Hydrogen Emission of. *Alfred H. Joy* . . 288

T Coronae Borealis at Its 1946 Outburst, The Spectrum of. *W. W. Morgan and Armin J. Deutsch* 362

Curve of Growth for Lines of *V* I, The Solar. *R. B. King and K. O. Wright* 224

χ Cygni, The Postmaximum Spectrum of. *Paul W. Merrill* 274

Eclipsing Binaries ZZ Cephei and UY Virginis, The. *George H. Herbig* 112

Eclipsing Binaries, Spectrographic Observations of Eight. *Otto Struve* 92

Eclipsing Binaries with *Ca* II Emission. *W. A. Hiltner* 481

Eclipsing Binary AH Cephei=HD 216014, A Photoelectric Study of the. *C. M. Huffer and Olin J. Eggen* 313

Eclipsing Binary Light-Curve, Tables Facilitating the Least-Squares Solution of an. *John B. Irwin* 380

Eclipsing Binary UX Monocerotis, The Spectrum of the. *Otto Struve* 255

Eclipsing Variable AR Aurigae, A Photoelectric Study of the. *C. M. Huffer and Olin J. Eggen* 106

Eclipsing Variable BD−6°2376, The New. *Chang Yuin* 303

Eclipsing Variable, Velocity-Curve of BD−6°2376, A New. *Y. C. Chang* 308

Eclipsing Variables, Some Remarks on the Determination of Intermediate Orbits of. *S. L. Piotrowski* 472

Editor's Note 312

Infrared Radiation from the Region of the Galactic Center, Six-Color Photometry of Stars. V. *Joel Stebbins and A. E. Whitford* 235

Infrared Spectra of Planets. *Gerard P. Kuiper* 251

Infrared Spectrum of ρ Cassiopeiae in 1946, The. *Philip C. Keenan* 295

Infrared Stellar Spectrometer, An. *G. P. Kuiper, W. Wilson, and R. J. Cashman* . . 243

Line Breadths and Voigt Profiles. *H. C. van de Hulst and J. J. M. Reesinck* 121

Luminosity Function, Variations in the Stellar. I. *S. W. McCuskey and C. K. Seyfert* . 1

RR Lyrae, TU Cassiopeiae, and T Monocerotis, Photoelectric Light-Curves of. *Katherine C. Gordon and Gerald E. Kron* 318

Magnitudes by Comparison with a Standard Field, The Determination of. *Harold F. Weaver* 366

T Monocerotis, Photoelectric Light-Curves of RR Lyrae, TU Cassiopeiae and. *Katherine C. Gordon and Gerald E. Kron* 318

UX Monocerotis, The Spectrum of the Eclipsing Binary. *Otto Struve* 255

Night Sky, The Extinction of Light of the. *S. L. Piotrowski* 466

β Pegasi, The Spectrum of. *Dorothy N. Davis* 28

DY Pegasi, The Variation in Radial Velocity and Spectral Type of the Ultra-Short-Period Variable. *W. P. Bidelman* 135

"Physics of Cosmic Grains, The," Remarks on F. Cernuschi's Paper. *D. ter Haar* . . 484

Planets, Infrared Spectra of. *Gerard P. Kuiper* 251

Polarization in the Continuous Radiation of Early-Type Stars, On the Presence of. *W. A. Hiltner* 231

Polarized Light, The Resonance Radiation Induced by Elliptically. *Donald R. Hamilton* 457

Remarks on F. Cernuschi's Paper, "The Physics of Cosmic Grains." *D. ter Haar* . . 484

υ Sagittarii, High-Dispersion Spectra of. *Jesse L. Greenstein and Walter S. Adams* . . 339

Solar Atmospheres, Model. *Guido Münch* 217

Spectra, A-Type Stars with Abnormal. *Lawrence H. Aller* 76

Spectra for Stars from F0 to K5, Luminosity Criteria from Objective-Prism. *J. J. Nassau and G. B. van Albada* 20

Spectra of Carbon Stars, The Absorption Continuum in the Violet Region of the. *G. Shajn and O. Struve* 86

Spectra of υ Sagittarii, High-Dispersion. *Jesse L. Greenstein and Walter S. Adams* . . 339

Spectral Type of the Ultra-Short-Period Variable, DY Pegasi, The Variation in Radial Velocity and. *W. P. Bidelman* 135

Spectrum of T Coronae Borealis at Its 1946 Outburst, The. *W. W. Morgan and Armin J. Deutsch* 362

Spectrum of χ Cygni, The Postmaximum. *Paul W. Merrill* 274
Spectrum of HD 190073, The Balmer Discontinuity in the. *Otto Struve* 358
Spectrum of β Pegasi, The. *Dorothy N. Davis* 28
Spiral Nebula, The Equation to the Arm of a. *E. A. Milne* 137
Stellar Atmosphere, On the Radiative Equilibrium of a. XIX. *S. Chandrasekhar and Frances H. Breen* 143
Stellar Atmosphere, On the Radiative Equilibrium of a. XX. *S. Chandrasekhar* . . . 145
Stellar Atmosphere, On the Radiative Equilibrium of a. XXI. *S. Chandrasekhar* . . . 152
Stellar Rotation, On. II. *M. Schwarzschild* 427
UY Virginis, The Eclipsing Binaries ZZ Cephei and. *George H. Herbig* 112
Wolf-Rayet Atmosphere, Comment on the. *Richard N. Thomas* 482

INDEX TO AUTHORS

ADAMS, Walter S., and Jesse L. GREENSTEIN. High-Dispersion Spectra of υ Sagittarii . 339
ALLER, LAWRENCE H. A-Type Stars with Abnormal Spectra 76
BIDELMAN, W. P. The Variation in Radial Velocity and Spectral Type of the Ultra-Short-Period Variable, DY Pegasi 135
BREEN, FRANCES H., and S. CHANDRASEKHAR. On the Radiative Equilibrium of a Stellar Atmosphere. XIX 143
CASHMAN, R. J., G. P. KUIPER, and W. WILSON. An Infrared Stellar Spectrometer . . 243
CHANDRASEKHAR, S. On the Radiative Equilibrium of a Stellar Atmosphere. XX . . 145
CHANDRASEKHAR, S. On the Radiative Equilibrium of a Stellar Atmosphere. XXI . . 152
CHANDRASEKHAR, S., and FRANCES H. BREEN. On the Radiative Equilibrium of a Stellar Atmosphere. XIX 143
CHANG, Y. C. Velocity-Curve of BD−6°2376, A New Eclipsing Variable 308
CODE, ARTHUR D. A Note on the Period-Spectrum Relation among Cepheids . . . 309
DAVIS, DOROTHY N. The Spectrum of β Pegasi 28
DEUTSCH, ARMIN J., and W. W. MORGAN. The Spectrum of T Coronae Borealis at Its 1946 Outburst 362
EGGEN, OLIN J., and C. M. HUFFER. A Photoelectric Study of the Eclipsing Binary AH Cephei=HD 216014 313
EGGEN, OLIN J., and C. M. HUFFER. A Photoelectric Study of the Eclipsing Variable AR Aurigae 106
GORDON, KATHERINE C., and GERALD E. KRON. Photoelectric Light-Curves of RR Lyrae, TU Cassiopeiae, and T Monocerotis 318
GREENSTEIN, JESSE L., and WALTER S. ADAMS. High-Dispersion Spectra of υ Sagittarii 339
HAMILTON, DONALD R. The Resonance Radiation Induced by Elliptically Polarized Light 457

HERBIG, GEORGE H. The Eclipsing Binaries ZZ Cephei and UY Virginis 112

HEYDEN, FRANCIS J., S.J. Colors of Seven Cepheid Variables in Cygnus 325

HILTNER, W. A. Eclipsing Binaries with *Ca* II Emission 481

HILTNER, W. A. On the Presence of Polarization in the Continuous Radiation of Early-Type Stars 231

HUFFER, C. M., and OLIN J. EGGEN. A Photoelectric Study of the Eclipsing Binary AH Cephei=HD 216014 313

HUFFER, C. M., and OLIN J. EGGEN. A Photoelectric Study of the Eclipsing Variable AR Aurigae 106

IRWIN, JOHN B. Tables Facilitating the Least-Squares Solution of an Eclipsing Binary Light-Curve 380

JOY, ALFRED H. The Absorption Lines within the Hydrogen Emission of Mira Ceti . . 288

KEENAN, PHILIP C. The Infrared Spectrum of ρ Cassiopeiae in 1946 295

KING, R. B., and K. O. WRIGHT. The Solar Curve of Growth for Lines of *V* I . . . 224

KRON, GERALD E., and KATHERINE C. GORDON. Photoelectric Light-Curves of RR Lyrae, TU Cassiopeiae, and T Monocerotis 318

KUIPER, G. P., W. WILSON, and R. J. CASHMAN. An Infrared Stellar Spectrometer . . 243

KUIPER, GERARD. Infrared Spectra of Planets 251

MCCUSKEY, S. W., and C. K. SEYFERT. Variations in the Stellar Luminosity Function. I 1

MERRILL, PAUL W. The Postmaximum Spectrum of χ Cygni 274

MILNE, E. A. The Equation to the Arm of a Spiral Nebula 137

MORGAN, W. W., and ARMIN J. DEUTSCH. The Spectrum of T Coronae Borealis at Its 1946 Outburst 352

MÜNCH, GUIDO. Model Solar Atmospheres 217

NASSAU, J. J., and G. B. VAN ALBADA. Luminosity Criteria from Objective-Prism Spectra for Stars from F0 to K5 20

PIOTROWSKI, S. L. The Extinction of Light of the Night Sky 466

PIOTROWSKI, S. L. Some Remarks on the Determination of Intermediate Orbits of Eclipsing Variables 472

REESINCK, J. J. M., and H. C. VAN DE HULST. Line Breadths and Voigt Profiles . . 121

ROMAN, NANCY G. A Note on β Cephei 311

SCHWARZSCHILD, M. On Stellar Rotation. II 427

SEYFERT, C. K., and S. W. MCCUSKEY. Variations in the Stellar Luminosity Function. I 1

SHAJN, G., and O. STRUVE. The Absorption Continuum in the Violet Region of the Spectra of Carbon Stars 86

STEBBINS, JOEL, and A. E. WHITFORD. Six-Color Photometry of Stars. V. Infrared Radiation from the Region of the Galactic Center 235

STRUVE, O., and G. SHAJN. The Absorption Continuum in the Violet Region of the Spectra of Carbon Stars 86

STRUVE, OTTO. Spectrographic Observations of Eight Eclipsing Binaries 92

STRUVE, OTTO. The Spectrum of the Eclipsing Binary UX Monocerotis 255

STRUVE, OTTO. The Balmer Discontinuity in the Spectrum of HD 190073 358

TER HAAR, D. Remarks on F. Cernuschi's Paper, "The Physics of Cosmic Grains," . . 484

THOMAS, RICHARD N. Comment on the Wolf-Rayet Atmosphere 482

UNDERHILL, ANNE B. Absorption Lines Formed in a Moving Atmosphere 128

VAN ALBADA, G. B., and J. J. NASSAU. Luminosity Criteria from Objective-Prism Spectra for Stars from F0 to K5 20

VAN DE HULST, H. C., and J. J. M. REESINCK. Line Breadths and Voigt Profiles . . . 121

WEAVER, HAROLD F. The Determination of Magnitudes by Comparison with a Standard Field 366

WHITFORD, A. E., and JOEL STEBBINS. Six-Color Photometry of Stars. V. Infrared Radiation from the Region of the Galactic Center 235

WILSON, W., G. P. KUIPER, and R. J. CASHMAN. An Infrared Stellar Spectrometer . . 243

WRIGHT, K. O., and R. B. KING. The Solar Curve of Growth for Lines of *V* I 224

YUIN, CHANG. The New Eclipsing Variable BD−6°2376 303
